their solutions.

```

The journey from a person who was extremely interested in astronomy and mathematics to a cold-blooded coder has been absolutely exciting. Leadership and self-confidence are couple of qualities among those that were instilled in me during my schooling days. Graphic Designing was the first most thing I planned to explore as soon as I join my Undergraduate Program, and I did it. I extended those skills to UI/UX designing. One of the best part I admire about Computer Science is that it is highly competitive and updated field. So next thing in my dish were Machine Learning and Deep Learning. Wait...! Did I forget to mention about the Digital marketing? Yes, maybe. By the way I did try out that as well. I will keep on exploring various fields with time.

But what have I learned the most is never hesitate to try anything new.</p>

About me

PROFESSIONAL PATH

Hey I am Kush Shah and I help people improve their solutions. The journey from a person who was extremely interested in astronomy and mathematics to a cold-blooded coder has been absolutely exciting. Leadership and self-confidence are couple of qualities among those that were instilled in me during my schooling days. Graphic Designing was the first most thing I planned to explore as soon as I join my Undergraduate Program, and I did it. I extended those skills to UI/UX designing. One of the best part I admire about Computer Science is that it is highly competitive and updated field. So next thing in my dish were Machine Learning and Deep Learning. Wait...I Did I forget to mention about the Digital marketing? Yes, maybe. By the way I did try out that as well. I will keep on exploring various fields with time. But what have I learned the most is never hesitate to try anything new.
